>> May 17 - 19, 2024 | Rapid City, SD <<

Level I - Endodon-Tricks and Surg & Rescue w/Dr. Nguyen

In Root Camp Level 1, learn over 3 days, the skills to tackle calcified molars, retreatment and entry-level apical surgery. Interactively presented is a tsunami of information that reiterate the core principles of clinical Endodontics, and highlight the latest and greatest innovations, from a science-supported standpoint but with a clinically-relevant and patient-centered approach.

Small class size allows each participant to remain engaged and their questions answered in depth. This first step in the Root Camp Series provides the “why” behind the “how” and equips attendees not only with clear-cut protocols but also the knowledge that they each need to trouble shoot the day-to-day challenges of modern clinical Endodontics. Level I culminates with a hands-on workshop that focuses on how to complete molar RCTs in 30-minutes.
