

### **The Magewell USB/CAP Plus device provides the following features:**

- Stream your camera's live video at 2K HD or 4K Ultra HD resolution to a local video monitor connected via HDMI
- Stream live video to your computer monitor connected via USB (dependent upon software selection)
- Capture 2K HD digital images or digital video directly to a folder on your computer
- Record an Audio track along with the video capture using an optional microphone
- Powered directly through your computer's USB connection
- Magewell Capture Express software is available as a free download for Windows
- Other compatible software: Zoom Rooms, Microsoft Teams Rooms, Skype for Business, Google Hangouts, GoToMeeting, VLC, OBS Studio, XSplit, etc.
- 3-year Manufacturer's Warranty

**FREE Magewell Capture Express software is available to be downloaded.**

[www.magewell.com/capture-express-v3](http://www.magewell.com/capture-express-v3)

This software allows you to view live video on your computer monitor, control various features of the Magewell device, and capture digital images and videos directly to your computer. If the path to the patient's image folder is known, images and videos can be captured into that folder directly. Please consult the Capture express User Manual for a wide variety of additional features.

If other compatible imaging software is selected, consult the manual for that application.
